

Leaders in Practical Spintronics

NVE
NVE CORPORATION

spin-TRON-ics

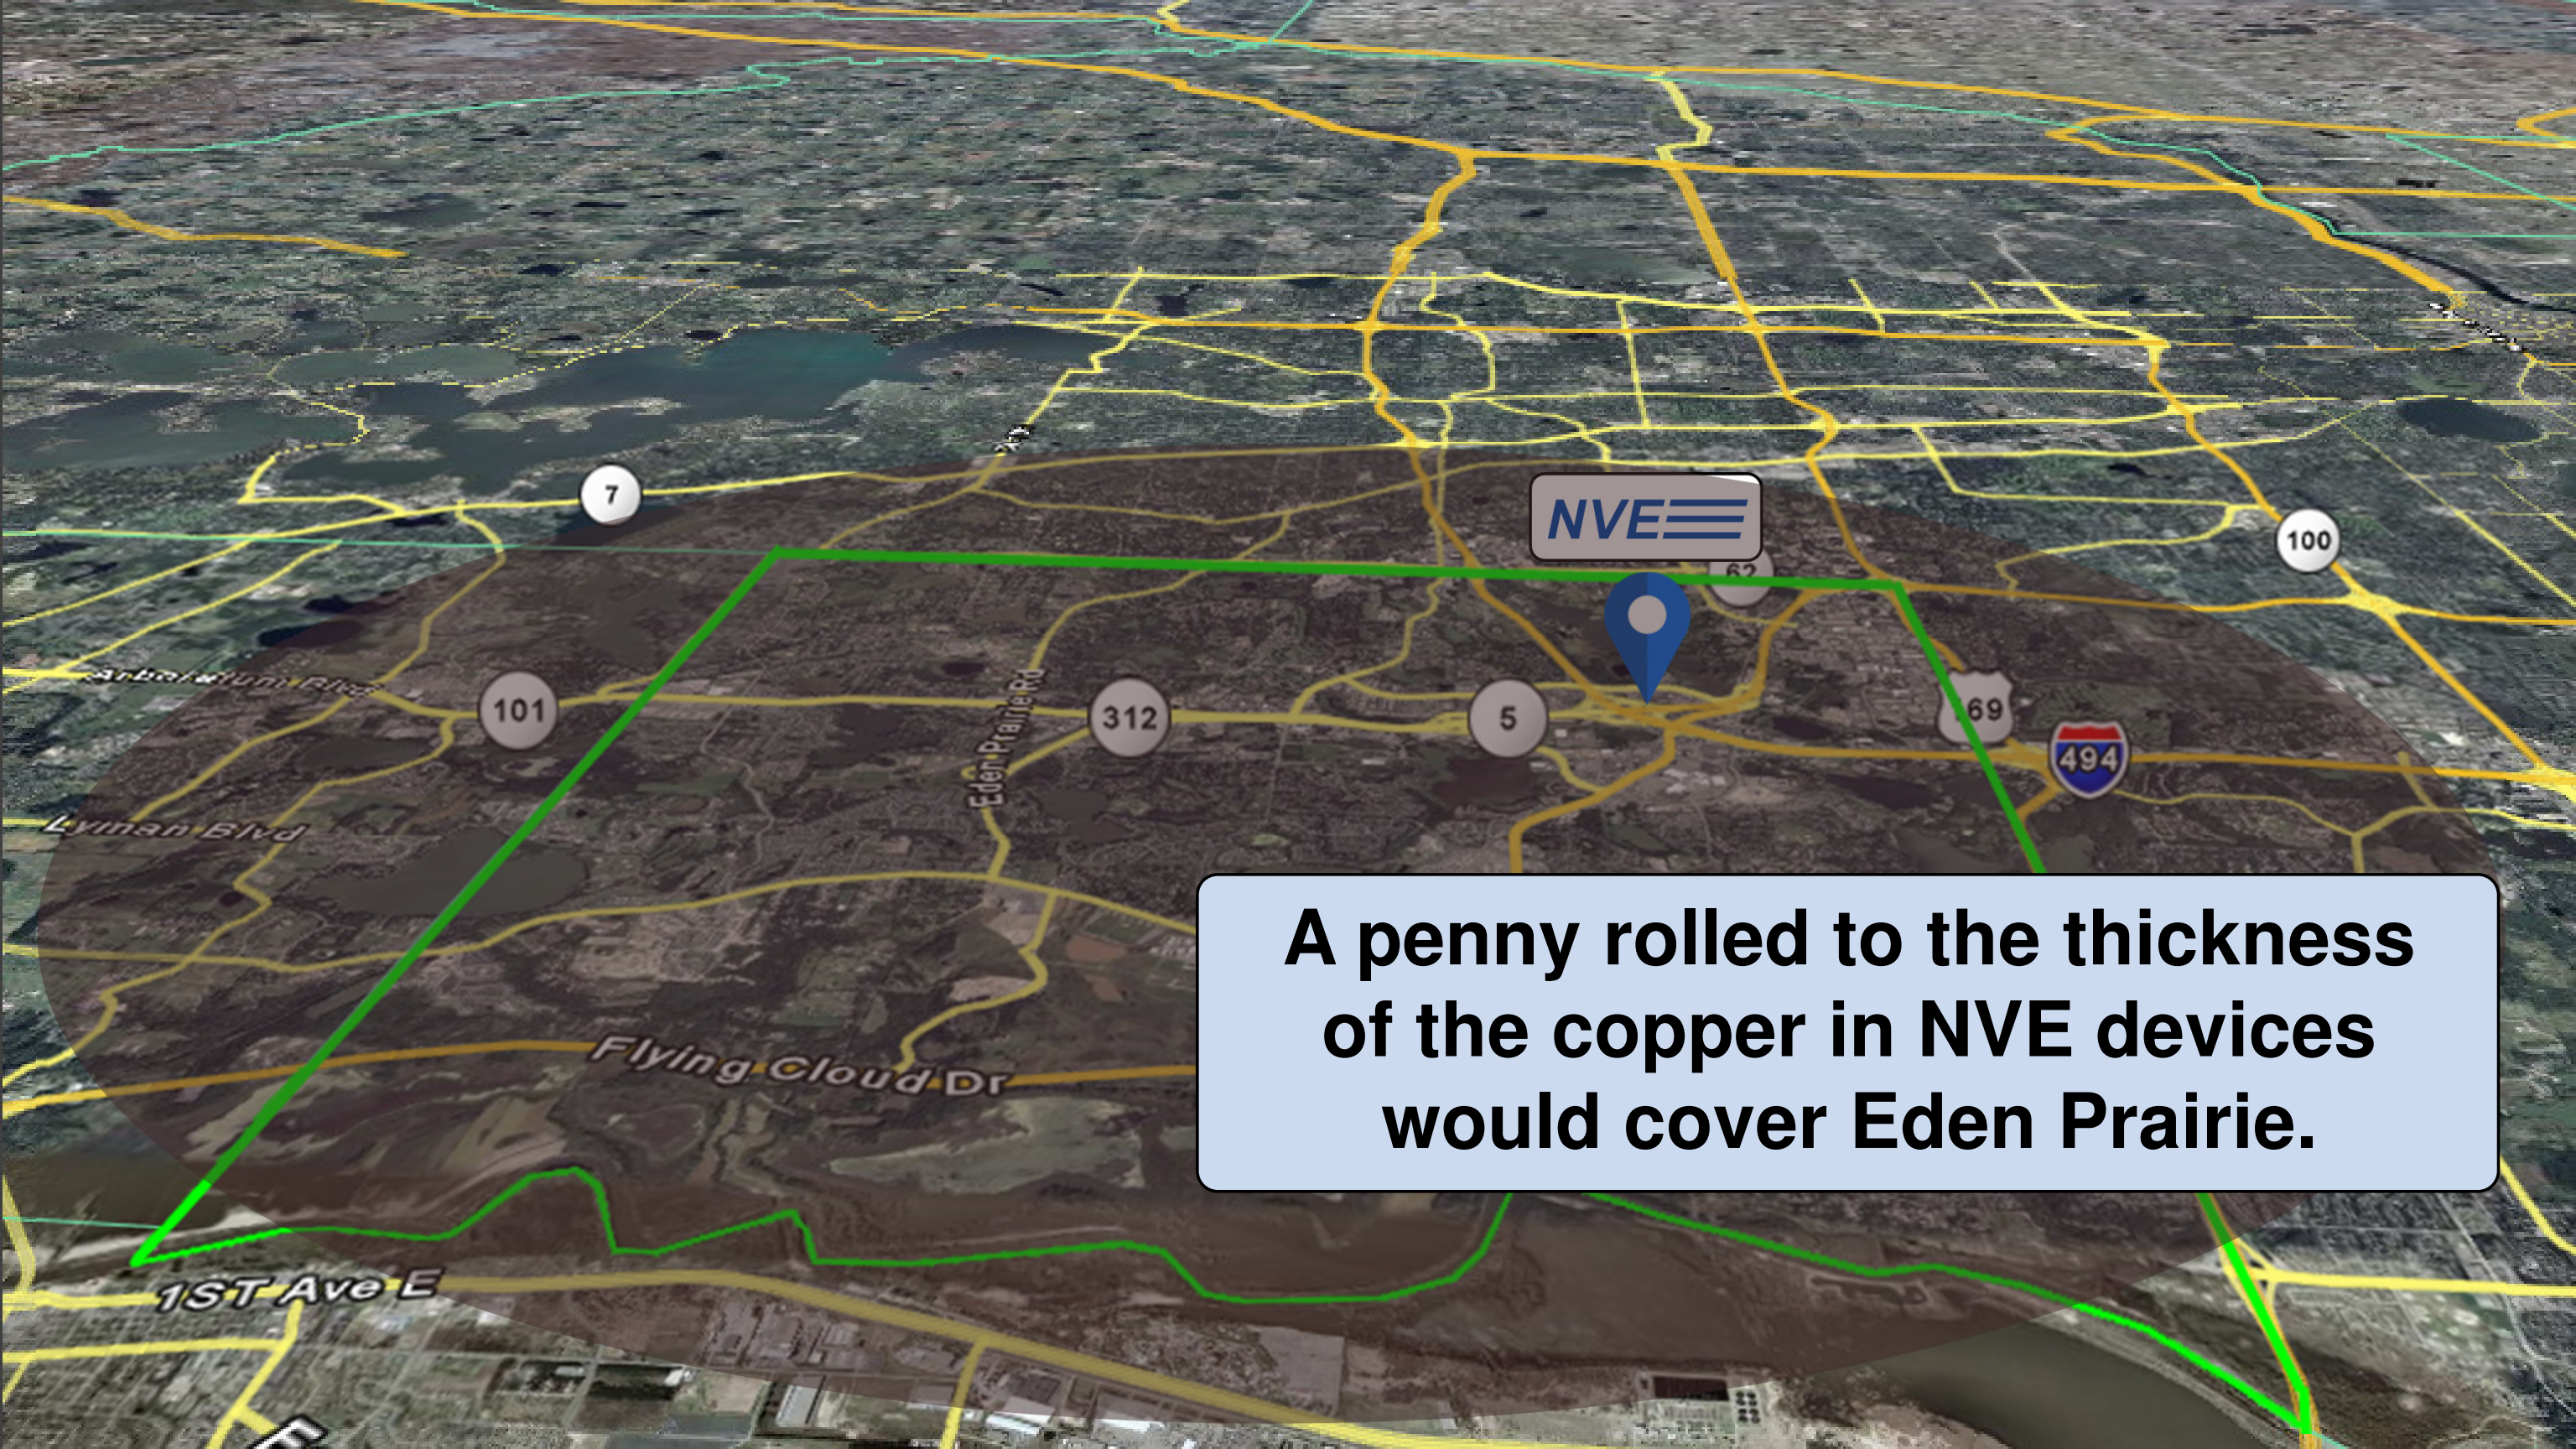

A nanotechnology that utilizes electron spin rather than electron charge to acquire, store and transmit information.

NVE
NVE CORPORATION

Nanoscale Critical Dimensions

3.5 nm
(8 atoms \pm 1 atom)

NVE

A penny rolled to the thickness of the copper in NVE devices would cover Eden Prairie.

NVE Devices Are In Familiar Products

Four Key Markets

Factory Automation

Medical Devices

Internet of Things

Next-Generation Cars

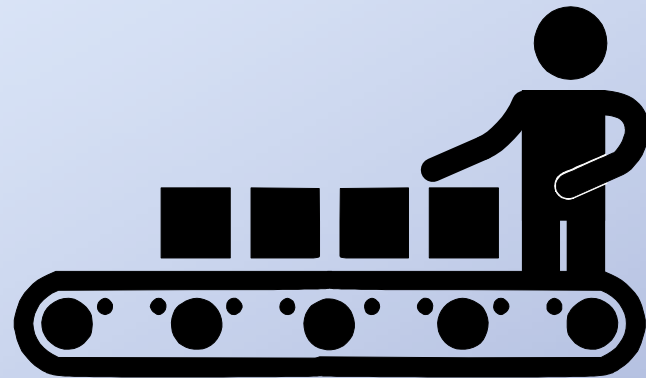

The 4th Wave of Industrial Automation

1st Wave

1770

Mechanization;
Steam Power

2nd Wave

1870

Mass Production;
Electricity

3rd Wave

1970

Robotics;
Computers

4th Wave

Now

Industrial IoT;
Ubiquitous
Sensors

The Spintronics “Four Bs”

Boxes

Miniaturization of medical and other devices

Bullet-proof

Inherently reliable

Batteries

Low power

Brains

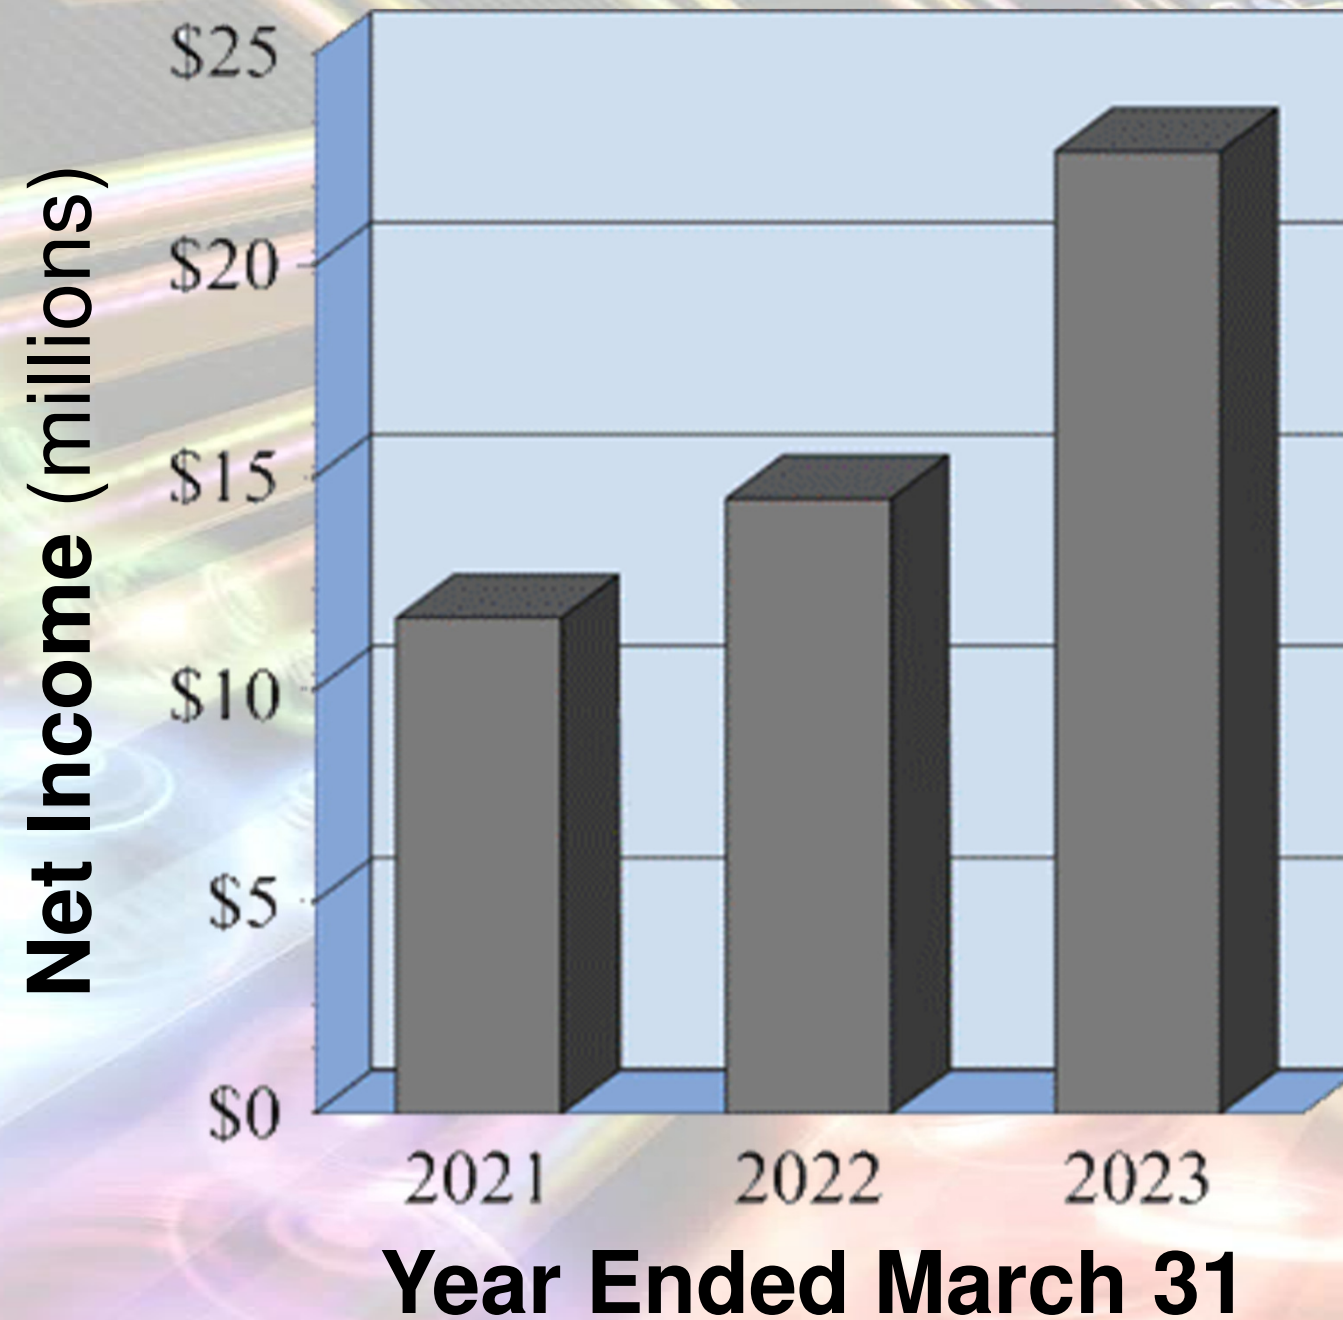

Smart connections for the Internet of Things

A Record-Shattering Year

-  Net income up 56% to \$4.70/share
-  Total revenue up 42%
-  Renewed Abbott Supplier Partnering Agreement
-  Approx. \$1 million in cap-ex (most in 10 years)

Record Profits in 2022 and 2023

Strong Balance Sheet

Cash plus marketable securities \$ 53,308,038

Total assets \$ 69,255,170

Shareholders' equity \$ 67,079,502

Best-in-Class Financial Metrics

 42% yr. / yr. revenue growth

 79% gross margin

 67% operating margin

 59% net margin

Why NVE?

-  Revolutionary technology
-  World-class customers and partnerships
-  Historic market opportunities
-  Exceptional financial performance
